DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect each claim, the phrase “and/or” is improper and should be removed.

Though not an ambiguity per se, claim 4 recites “VIP”, which should be in lower case and not in acronym form.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen #6,000,505. Allen, as best seen in Figures 2A-8, and recited in column 5, lines 59-61, column 6, lines 7-47, column 7, lines 17-21, and column 12, lines 45-64, discloses a method for evacuating occupants from an elevator comprising a means for determining of the load capacity of an elevator car 20 by means of a elevator controller/control unit 16, that can strategically position multiple elevators during an emergency, emergency condition detectors 8, 22, 25, 26, which are

interconnected with a CPU capable of identifying signals from the detectors by digital (numeric code) protocol, an elevator/stairway visual indicating means 114, 116, 118, 320, the emergency evacuation sequence of columns 15 and 16, emergency evacuation zone 202, 214, designated floors 188, 206, 208, 210, the method permitting for the evacuation of persons from specific floors and ultimately the entire building.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vandeweghe #4,074,225, Topol et al #4,531,114, Fukuda et al #4,852,696, Allen #5,979,607, Fargo et al #6,196,355, Meacham #6,206,142, Weng #6,529,128, Gazdzinski #6,615,175, Megerle #6,778,071, Bowman et al #6,828,918, Lemelson et al #6,873,256 are cited to teach emergency elevator systems.
